About PULSUS

Pulsus Group is an internationally renowned medical peer-review publisher and conferences organizer established in the year 1984 publishes and hosts the work of researchers in a manner that exemplifies the highest standards in research integrity.

PULSUS conferences act as a catalyst on the research trends that really matter and spurring their adoption by exploring and disseminating cutting-edge information. Thus, mainly adhere to stringent peer-review procedure with a view to set an example in promoting standard medical research with integrity. As an ardent supporter of medical publishing, Pulsus Group closely associates with the Canadian and other international medical research associations like Canadian Society of Plastic Surgeons, Canadian Society for Aesthetic Plastic Surgery, Groupe pour l'Avancementde la Microchirurgie Canada, Canadian Society for Surgery of the Hand. It publishes a wide range of medical journals that focus on medical specialties like cardiology, Integrative Medicine, Surgery and Reproductive Medicine.

Pulsus Conferences explore the future by connecting minds and spreading brilliance at Pulsus Group annual conferences & meetings. Meet your colleagues, discuss your specialty, spread and aid, learn & grow in association with 1000+ scientific societies from The USA, Europe, The Middle East, Africa and The Asia-Pacific region. Pulsus group is closely associated with globally renowned academic and research societies.

Pulsus Conferences believe that true technology and innovation depends on hearing from, and listening to, people with a variety of perspectives. Pulsus Conferences enhances the technology for people from underrepresented groups by actively recruiting diverse speakers for our events, signing up a broad variety of authors for journals and videos, and taking part in ongoing conversations about the value of diversity in the communities we serve.

Market Analysis

Bacteriology is the study of bacteria and interrelated subjects which includes application in health care, microbiology,biotechnology,cell biology and other various fields. The recent revolution is the identification of bacteria by the phenotypic characteristic through Matrix -assisted laser desorption ionization time-of-flight (MALDI-TOF) mass spectroscopy. The virulence of the bacteria have increased by the climatic condition and seasonal changes. No humans can be germ free and so the presence of bacteria is enormous causing infectious diseases on humans. Infectious diseases are the third leading cause of death in USA and major leading cause of death in other parts of the world. Vaccines are used in the preventive measures of infectious diseases. Bacteriophages act as bioagents for the treatment of infectious diseases. Antibodies and antigens play an important role in the vaccine production and thus the improvement in the attenuated bacterial vaccines to reduce infection in human is encouraging.

About City and Venue

Netherlands is a beautiful country located in the North-western part of Europe with serene and calm landscapes and canals. Amsterdam is the capital of Netherlands. Netherlands is famous for its Tulip fields, flat landscapes, Canals, Cycling and Art Museums. Amsterdam is home to the prestigious Rijks museum, Van Gogh Museum and the house where Jewish diarist Anne Frank hid during WWII. With so many buildings and trees on the canal sides Amsterdam is one big treat for the body and soul. The Netherlands has long lasting history of social tolerance and is commonly regarded as a liberal country, having legalized abortion, prostitution and euthanasia, and even maintaining a progressive drugs policy. Netherlands opened the world of liberalism when it accepted LGBT communities and also legalized same sex marriage for the first time in the world. Netherlands is the world's second largest agricultural exporters after USA.
