Market Analysis

Growth in the biomarker market is due to factors such as increasing the use of diagnostic biomarkers, R&D in the pharmaceutical and biotechnology fields, the high amount of cancer, new innovations in biomarker research and low-cost clinical trials in developing countries. High capital investment and low-cost ratio and technical storage issues are the major factors limiting the growth of this market.

The global biomarkers market was estimated at \$24.10 billion in 2015, \$41.2 billion in 2018, USD 45.55 billion in 2020, USD 53.3 billion in 2021.

Analysis of biomarkers for next 5 years: Biological markers successfully predict drug efficacy quickly from conventional clinical endpoints. These Biomarker accessories will also inflate its demand among end-user industries over the next few years. From medical oncology to nanotech sectors, biomarkers have been expanding their branches throughout the years and plan to expand the field in science and technology in the future..
