Market Analysis

Brain stroke is a general term that describes a group of symptoms-such as Ischemic stroke, heart attack, loss of memory, judgment, language, complex motor skills, and other intellectual function-caused by the permanent damage or death of the brain's nerve cells, or neurons.

Brain stroke, including Ischemic strokes, Hemorrhagic strokes, and Transient ischemic attacks is one of the biggest global public health challenges facing our generation.

Globally, results of a recent meta-analysis suggest that 48 million people lived with Brain Stroke worldwide in 2010, with numbers expected to almost double every 20 years, to 65.7 million in 2030 and 115.4 million in 2050. In 2010, 58 percent of all people with Brain Stroke lived in countries with low or middle incomes, with this proportion anticipated to rise to 63 percent in 2030 and 71 percent in 2050.This number is expected to double by 2030 and more than triple by 2050 to 115 million.

In the United States alone, experts estimate that as many as five million people age 45 and older suffer from Brain Stroke.

Research conducted by the Brain stroke Society, shows that there will be 850,000 people living with dementia in the UK by 2015. This will cost the UK £26 billion a year.

Two-thirds (£15.4 billion) of the cost of dementia is paid by people with dementia and their families, either in unpaid care (£12.6 billion) or in paying for private social care. This is in contrast to other conditions, such as heart disease and cancer, where the NHS provides care that is free at the point of use.

About City

Frankfurt, a central German city on the river Main, is a major financial hub that's home to the European Central Bank. It's the birthplace of famed writer Johann Wolfgang von Goethe, whose former home is now the Goethe House Museum. Like much of the city, it was damaged during World War II and later rebuilt. The reconstructed Altstadt (Old Town) is the site of the Römerberg, a square that hosts an annual Christmas market.

Römer:The Römer is a medieval building in the Altstadt of Frankfurt am Main, Germany, and one of the city's most important landmarks. The Römer is located opposite the Old St. Nicholas church and has been the city hall of Frankfurt for over 600 years
