ABOUT US

Since many years Pulsus has also been very instrumental to provide an invaluable channel for scientists and researchers to exchange ideas and research by creating a forum for discussing the possibilities of future collaborations between universities, institutions, research bodies and organizations from different countries through international conferences and meetings.

Pulsus Group is an internationally renowned medical peer-review publisher and conferences organizer established in the year 1984 publishes and hosts the work of researchers in a manner that exemplifies the highest standards in research integrity.

With a legacy of 30 years of excellence in Medical Publishing we are endorsed by various societies like International Academy of Cardiovascular Sciences, International Society of Addiction Medicine, European Biotechnology Thematic Network Association, World Federation of Paediatrics Intensive and Critical Care Societies, World Association of Medical Sciences, International Society for Ceramics in Medicine, Thalassaemia International Federation and World Association of Integrated Medicine to nurture the research and development for the beneficence of society.

MARKET ANALYSIS

The market for breast cancer therapeutics was worth more than USD 25.5 billion in 2021, and it is anticipated to grow by 8% between 2022 and 2028. One of the key drivers of the overall market growth is the rising incidence of breast cancer. The International Agency for Research on Cancer (WHO) estimates that in 2020, there were 2,261,419 new instances of breast cancer, or about 11.7% of all cancer cases worldwide. Breast cancer therapeutics is the term used to describe how HYPERLINK "https://breastcancer-congress.pulsusconference.com/registration"breast cancer is treated or managed to utilize therapeutic methods and medications such as hormone therapy, chemotherapy, targeted therapy, and other therapeutics. These medications prevent malignant cells from proliferating and growing by interfering with specific proteins or DNA.

It is projected that the regional government authorities' launch of breast cancer awareness and screening programs to reduce the mortality rates linked to breast cancer will be favorable for the market statistics. Breast cancer therapies are becoming more and more effective at curing the disease, and they offer survival rates of over 90%, especially when it's caught early on. Therefore, various local government organizations control and provide breast cancer screening programs across numerous countries to encourage the practice of timely cancer screening for early diagnosis.

The global market for treatments for metastatic breast cancer was estimated at USD 14341.14 million in 2022 and is projected to grow at a CAGR of 11.87% from 2022 to 2027, totaling USD 28111.27 million. Due to the COVID-19 pandemic, the global market for breast cancer treatment is anticipated to reach USD million in value in 2022 and USD million in 2028, with a CAGR of% over the forecast period of 2022–2028. Fully taking into consideration the financial impact of this health problem, Portable, which in 2021 accounted for% of the global market for Breast Cancer Treatment, is anticipated to reach USD million in value by 2028, rising at a revised% CAGR from 2022 to 2028. While throughout this prediction period the CAGR for the telecom segment is changed to %. We are proud to have well-known Keynote Speakers from around the globe as well as numerous concurrent oral and poster presentations, including strong scientific programs on important health issues and improvements in Breast Cancer Therapy from conference participants.

TARGET AUDIENCE

ABOUT VENUE

Madrid is the capital of Spain and is home to the Spanish Royal family as well as the Spanish Government. It is a modern metropolitan city and an economic and industrial center of Spain, and, with its population of nearly 3,5 million people, is also the biggest city in Spain. It is located in the center of the Iberian Peninsula and is surrounded by mountains and natural parks. Although it is located in the center of the country, it has traditionally been the hub between different areas of Spain and is therefore connected to all major Spanish cities by train, road, or air. Madrid has a lot of interesting attractions that offer both culture and amusement.

The city is full of great monuments, like the royal palace, the Plaza Mayor or the many statuettes, and for people interested in art, the museum's Del Prado, Reina Sofia or Thyssen have some of the most fantastic collections of famous Spanish painters like Velazquez, Goya, Picasso or Miro. If you like to be entertained, Madrid has two big amusement parks and there are regular international concerts, big flea markets, parades and other activities going on.

To sports enthusiasts, Madrid can offer everything from skiing (only 1 hour away by bus) during the winter, to golf all year round, as well as international sporting events and the possibility to practice nearly any sport at the University facilities. If you like going out at night, Madrid has a very interesting nightlife throughout the whole week and which is available all year round. You can either go out for a tapa (Spanish snack), eat at a very nice restaurant, go to the cinema or one of the many theatres, or find nearly any type of bar or disco.The Government's headquarters, the Cortes, and the official residence of the Kings of Spain are all located in Madrid. In financial terms, Madrid houses the headquarters of numerous international and national companies. The capital is also a haven of culture, with world-famous museums such as the Prado Museum and the Reina Sofia Museum.
