6th INTERNATIONAL CONFERENCE ON

CANCER RESEARCH AND TREATMENT

FEBRUARY 12-13, 2026 | PARIS, FRANCE

https://cancer.pulsusconference.com/

INVITATION

CANCER 2026

It is with great pleasure that we invite you to participate in the **6th International Conference on Cancer Research and Treatment**, taking place on **February 12–13, 2026**, in **Paris, France**, under the theme ***"Outsmarting Cancer: Innovation at Every Stage."***

This international forum brings together leading researchers, clinicians, academicians, and industry experts dedicated to advancing innovation and collaboration in oncology. The conference will spotlight cutting-edge progress in cancer diagnostics, targeted therapies, immuno-oncology, precision medicine, and translational research.

Participants will engage in a dynamic scientific program featuring high-impact presentations, keynote lectures by global experts, interactive panel discussions, and hands-on workshops. The meeting offers an exceptional opportunity to exchange pioneering ideas, gain valuable clinical insights, and explore future strategies shaping the evolving landscape of cancer care.

Set in the heart of Paris, this conference provides a stimulating environment to expand your knowledge, strengthen your professional network, and contribute to meaningful collaborations across the global cancer research community.

We would be honored by your presence and look forward to your valuable participation in advancing the future of oncology.

Warm Regards,
Ellie Rebecca
Program Manager

MARKET ANALYSIS

The Global Oncology Therapeutics and Diagnostic Technologies Market (2022–2029) is witnessing strong growth, driven by the increasing incidence of cancer, continuous innovation in diagnostic technologies, and the rising demand for precision medicine. The market covers a wide range of solutions, including immunotherapy, targeted therapies, chemotherapy, radiotherapy systems, advanced imaging technologies such as MRI, PET, and CT, along with molecular profiling and genomic platforms. These advancements are enabling oncologists to deliver personalized, patient-centric treatments that improve clinical outcomes.

The modern oncology ecosystem integrates multidisciplinary tools such as biopsy systems, genomic testing kits, biomarker-based diagnostics, and AI-powered software for treatment planning and clinical decision-making. These technologies are increasingly being connected with electronic health records and tele-oncology platforms, enhancing accessibility, efficiency, and personalization across the cancer care continuum. Insights from clinical trials, real-world evidence, and population-based studies are reshaping approaches to cancer diagnosis, treatment, and survivorship.

According to Data Bridge Market Research, the global oncology market was valued at approximately USD 42.36 billion in 2021 and is projected to reach USD 71.70 billion by 2029, growing at a CAGR of 6.80%. This expanding landscape presents significant opportunities for research collaboration, biotechnology innovation, and technology-driven care models. Global conferences play a vital role in fostering partnerships, showcasing breakthrough research, and advancing future-ready strategies that will define the next era of oncology care.
