"Theme: Latest Developments and the Forecast for Cancer Research and Treatment"

INTERNATIONAL CONFERENCE ON CANCER RESEARCH AND TREATMENT

DECEMBER 07-09, 2023 | MADRID, SPAIN

https://cancer.pulsusconference.com/

INVITATION

CANCER CONFERENCE 2023

Greetings,

We are pleased to announce the "**International Conference on Cancer Research and Treatment**" Scheduled on **December 07-09, 2023** in **Madrid, Spain**. The conference will be organized around the theme "***Latest developments and the forecast for cancer research and treatment***".

We are delighted to extend an appeal to you to undergo cancer Research 2023, which will maximize attendees and speakers during professional and social interactions that are just as important as the sessions themselves.

Our objective is to present an excellent program that covers the whole range of immunology research and breakthroughs, encourages top-level research, and focuses on the field's current exceptional accomplishments as well as future trends and requirements. The system's most current research and technology are discussed in detail.

The goal of cancer Research 2023 is to advance knowledge and fresh concepts among professionals, academics, and academics working in the disciplines of cancer research and treatment. In vibrant discussions throughout the program, participants will discuss their discoveries and interests. Together with the usual plenary, keynote, and oral abstract sessions, the program will also feature educational lectures, interactive workshops, and hands-on activities.

Welcome you all to the cancer research and treatment conference 2023!!

Regards

Celena Christopher | Program Manager

ABOUT US

Since many years Pulsus has also been very instrumental to provide an invaluable channel for scientists and researchers to exchange ideas and research by creating a forum for discussing the possibilities of future collaborations between universities, institutions, research bodies and organizations from different countries through international conferences and meetings.

Pulsus Group is an internationally renowned medical peer-review publisher and conferences organizer established in the year 1984 publishes and hosts the work of researchers in a manner that exemplifies the highest standards in research integrity.

With a legacy of 30 years of excellence in Medical Publishing we are endorsed by various societies like International Academy of Cardiovascular Sciences, International Society of Addiction Medicine, European Biotechnology Thematic Network Association, World Federation of Paediatrics Intensive and Critical Care Societies, World Association of Medical Sciences, International Society for Ceramics in Medicine, Thalassaemia International Federation and World Association of Integrated Medicine to nurture the research and development for the beneficence of society.

MARKET ANALYSIS

The worldwide oncology market is expanding as a result of the growing cancer conference 2023 burden globally caused by rising alcohol and cigarette use. In its GLOBOCAN report, the International Agency for Research on Cancer (IARC) estimates that there were roughly 19.3 million new cases of cancer and 10 million cancer-related deaths worldwide in 2020. According to the IARC, global new cancer cases are predicted to increase by 47% between 2020 and 2040.

Thus, it is anticipated that the rising incidence of cancer would encourage the use of oncology diagnostics and oncology treatments everywhere, thereby fostering the expansion of the worldwide cancer conference 2023 market. Additionally, it is anticipated that the market would rise as a result of increased government and non-profit activities to raise awareness about cancer prevention. For instance, the Global Action Plan for Prevention and Control of Non-Communicable Diseases of the World Health Organization seeks to reduce the number of preventable deaths from diabetes, cancer, cardiovascular disease, and other chronic respiratory illnesses by around 25% by the year 2025. The need for early cancer diagnosis and treatment has increased due to the growing frequency of numerous chronic illnesses.
