Market Analysis

PULSUS
WWW.PULSUSCONFERENCE.COM

Cancer is a disease in which cells grow abnormally and have the potential to spread to different parts. The abnormal growths without being harmful are called the benign tumors or the non-cancerous growths. Those cells which divide uncontrollably and spread to the nearby tissues are called the malignant tumors or the cancerous growths. The spread form the primary site (the place it originated) to the secondary site is called metastasis. The causative agents of cancer are called carcinogens. There are different types of cancers named based on their origin of development. These days many advancements have come in the field of cancer starting from diagnosis, treatment and prevention.

About City and Venue

PULSUS
WWW.PULSUSCONFERENCE.COM

Dubai is the largest city located on the southeast coast of the Persian Gulf and is the most populous city in the United Arab Emirates. Dubai is the business hub and major global transport hub of the Middle East. It has attracted many tourists through its large construction buildings like the Burj Khalifa, which is the world's tallest building. There are 28 hospitals in Dubai and it has made health insurance mandatory for all and thus increased the demand for medical services.
