MARKET ANALYSIS

Cardiology 2023 and cardiovascular diseases (CVDs) are major health concerns worldwide. According to the World Health Organization (WHO), CVDs are the leading cause of death globally, accounting for 31% of all deaths. This has resulted in a growing demand for advanced cardiology treatments and therapies.

The global cardiology 2023 market is expected to grow at a CAGR of 6.9% from 2021 to 2026, reaching $97.4 billion by 2026. The market is driven by factors such as the increasing prevalence of CVDs, technological advancements in cardiology devices, and the growing geriatric population.

In terms of product type, the cardiology 2023 market can be segmented into devices, drugs, and software. The devices segment holds the largest share of the market, driven by the increasing demand for implantable cardiac devices such as pacemakers, implantable cardioverter defibrillators (ICDs), and cardiac resynchronization therapy (CRT) devices.

Importance and Scope

Key market players in the cardiology market include Abbott Laboratories, Boston Scientific Corporation, Medtronic plc, Johnson & Johnson, and Siemens Healthineers AG, among others. These players are focusing on strategic collaborations, partnerships, and product launches to strengthen their market position and expand their geographic reach.

ABOUT VENUE

Dubai – the "City of Gold" where anything is possible. Dubai, once a modest fishing community on the Arabian Gulf, is now one of the world's most multicultural cities. The city is home to more than 200 different nationalities and is one of the seven emirates that make up the United Arab Emirates. It provides all visitors with an outstanding experience. Whether it's on top of the Burj Khalifa, the highest skyscraper in the world, or by the banks of the Creek, Dubai exudes an air of promise and creativity. And memories are simply waiting to be produced here with an unrivalled coastline, stunning desert, and spectacular cityscapes. The Emirate's economy is driven by a Western-style business model, with the primary sources of income currently being tourism, aviation, real estate, and financial services. Due to numerous large-scale, innovative development projects and sporting events, Dubai has recently captured the attention of the world. The world's tallest building, the Burj Khalifa, and other skyscrapers and high-rise structures have made the city famous.

Dubai has a subtropical, desert environment with year-round sunshine, clear skies, and warm temperatures. In January, the maximum temperature is 24 °C, while in July, it is 41 °C. Dubai is best visited between December and March when the weather is comfortable during the day and chilly at night. From November to March is the ideal time to travel to Dubai. In terms of weather, Dubai only really has two seasons: hot and hotter. The city experiences clear sky and ideal beach weather during the winter. On the other hand, this is also the busiest travel period, so Jumeirah Beach should be crowded.
