2nd GLOBAL SUMMIT ON

CARDIOLOGY RESEARCH

JUNE 13-14, 2022 | WEBINAR

https://cardiologymeeting.pulsusconference.com/

INVITATION

CARDIOLOGY CONGRESS 2022

We take a great pride in welcoming all the attendees for our 2nd Global Summit on Cardiology Research scheduled between June 13-14, 2022 through Virtual mode. This conference will deliver new ideas, convictions, strategies and tactics where no conference will offer an impressive roaster of Keynote speakers, quality attendees, and compelling content.

This year's Cardiology Conference focuses on the theme "Out-reaching the future prospects of cardiology research for better tomorrow". The Cardiology 2022 aims to reinforce the Interdisciplinary Approach for Innovation & Invention in Cardiology.

Participants will be able to establish a friendly, warm network environment which will allow them to interact with other Institutes/attendees and share their ideas, laying the foundation for future vision and development.

ABOUT US

Since many years Pulsus has also been very instrumental to provide an invaluable channel for scientists and researchers to exchange ideas and research by creating a forum for discussing the possibilities of future collaborations between universities, institutions, research bodies and organizations from different countries through international conferences and meetings.

Pulsus Group is an internationally renowned medical peer-review publisher and conferences organizer established in the year 1984 publishes and hosts the work of researchers in a manner that exemplifies the highest standards in research integrity.v

With a legacy of 30 years of excellence in Medical Publishing we are endorsed by various societies like International Academy of Cardiovascular Sciences, International Society of Addiction Medicine, European Biotechnology Thematic Network Association, World Federation of Paediatrics Intensive and Critical Care Societies, World Association of Medical Sciences, International Society for Ceramics in Medicine, Thalassaemia International Federation and World Association of Integrated Medicine to nurture the research and development for the beneficence of society.

MARKET ANALYSIS

In the overall cardiovascular therapeutics market, new drugs and devices are emerging instantaneously. A recent outbreak of cardiovascular disease can be partly attributed to diabetes, according to cardiovascular market study experts. One of the main factors driving the growth of the heart failure market is the expanding prevalence of recurring diseases such as diabetes. Heart failure market size is projected to expand in the coming years as a newly approved drug enters the market.

For the period of 2018-2023, the worldwide market for cardiovascular devices reached nearly $42.4 billion in 2018 and should reach $59.1 billion by 2023, at a compound annual growth rate (CAGR) of 6.9%. Over 1.8 million deaths occurred in Europe and the European Union (EU). In addition, other factors, such as the rapid technological advancements, growing awareness among residents, and a high level of preference for minimally invasive techniques, are also driving the market growth. According to business intelligence provider GBI Research, the cardiovascular disease market is predicted to grow from $129.2 billion in 2016 to $146.4 billion by 2023, at a very modest compound annual growth rate of 1.8%.
