ABOUT VENUE

The city of London is the capital of the United Kingdom. It is both one of the world's oldest and most cosmopolitan cities, with a history spanning over two millennia. It is not just the country's largest metropolis, but also its economic, transportation, and cultural hub. By 1800, London's population had surpassed one million. It grew to 6.5 million people a century later. London is located in south-eastern England, 50 miles (80 kilometers) upstream from the Thames's estuary on the North Sea. The metropolis may be seen compactly in a Green Belt of open countryside in satellite pictures, with its main ring route (the M25 motorway) looped around it at a radius of around 20 miles (30 kilometers) from the city center. The growth of the built-up area was halted by strict town planning controls in the mid-1950s. The top sightseeing places in London are Buckingham Palace, St. Paul's Cathedral, London Eye, Westminster Abbey, Tower Bridge, British Museum. London, UK.
