Market Analysis

PULSUS
WWW.PULSUSCONFERENCE.COM

One of the most challenging study of this times is understanding and interpreting the Changing climate system of the earth. Paleoclimatology plays an pivot role in understanding the past climates. Nowadays due to the change in the Climatic Conditions there finds to be a high Biodiversification and a reduction in Biodiversity. The influence by the humans against the natural forces creates a drastic change by increasing the emission of greenhouse gases not in a particular ecosystem but on a whole planet by increasing industrialization and by desertification. The high increase in the population has led to an increasing harmful impacts and disasters. This impacts not only affects the resources but also affects the comfortability of living including shifting shorelines, declining agricultural productivity, crisis of food supply, availability of water, the health of populations, and extreme weather events such as flooding, drought and intense hurricanes. Hence there should be in a need of Understanding risks, Managing them, Adaptation to the climate change and reducing future alterations in weather. Climate Change 2019 focuses mainly on the human activities, Impacts, Solution and steps to control the variabilities in Weather events.
