Since many years Pulsus has also been very instrumental to provide an invaluable channel for scientists and researchers to exchange ideas and research by creating a forum for discussing the possibilities of future collaborations between universities, institutions, research bodies and organizations from different countries through international conferences and meetings.

Pulsus Group is an internationally renowned medical peer-review publisher and conferences organizer established in the year 1984 publishes and hosts the work of researchers in a manner that exemplifies the highest standards in research integrity.

With a legacy of 30 years of excellence in Medical Publishing we are endorsed by various societies like International Academy of Cardiovascular Sciences, International Society of Addiction Medicine, European Biotechnology Thematic Network Association, World Federation of Paediatrics Intensive and Critical Care Societies, World Association of Medical Sciences, International Society for Ceramics in Medicine, Thalassaemia International Federation and World Association of Integrated Medicine to nurture the research and development for the beneficence of society.

MARKET ANALYSIS

Clinical Gastro 2023 Overview:

During the projected period, the Gastrointestinal Therapeutics Market is estimated to grow at a CAGR of 6.8%.

According to a study published in the Digestive Diseases Journal in March 2021 by Hunt R.H.a et al., the SARS-CoV-2 virus can impact the digestive system, and individuals with pre-existing illness are at the greatest risk of negative effects. Some repurposed medications used to treat COVID-19 can cause or exacerbate COVID-19-related gastrointestinal symptoms, as well as liver harm.

The rising prevalence of gastrointestinal illnesses in the country is also driving up market demand. According to a study published in the BMC Journal in August 2020 by Thomas Joshua Pasvol et al., the incidence of inflammatory bowel disease (IBD), Crohn's disease (CD), and ulcerative colitis (UC) in the United Kingdom was found to be 28.6, 10.2, and 15.7 per 100,000 people, respectively. Furthermore, the incidence of inflammatory bowel disease (IBD) among adolescents aged 10–16 years increased from 13.1/100,000 population in 2000 to 25.4/100,000 population in 2018..

ABOUT VENUE

Dubai is the most populous and largest city in the United Arab Emirates (UAE). It is situated on the southeast shoreline of the Persian Gulf and is one of the seven emirates that make up the nation. The city of Dubai is situated on the emirate's northern coastline and heads up the Dubai-Sharjah-Ajman metropolitan territory. Dubai has developed as a global city and business center point of the Middle East. It is likewise a noteworthy transport center point for travelers and freight. Dubai has attracted world attention through large construction projects and sports events, the world's tallest building, the Burj Khalifa. By 1960s, Dubai's economy was based on revenues from trade and, to a smaller extent, oil exploration concessions, but oil was not discovered until 1966. Oil revenue first started to flow in 1969. Dubai's oil revenue helped accelerate the early development of the city, but its reserves are limited, and production levels are low: today, less than 5% of the emirate's revenue comes from oil. The emirate's Western-style model of business drives its economy with the main revenues now coming from tourism, aviation, real estate, and financial services. Dubai has recently attracted world attention through many innovative large construction projects and sports events.
