PULSUS brings in a new spin on conferences by presenting the latest scientific improvements in your field. Listen to motivating keynotes from thought leaders, or rub elbows with pioneers across the globe. Dubai is all set for an amazing event as PULSUS proudly presents the "8th International conference on Central Nervous System" slated on December 04-05, 2019 at Dubai, UAE.

PULSUS cordially welcome researchers, academicians, students and business professionals in the field of CNS professionals from around the world to participate in the upcoming CNS 2019. The meeting for this year will revolve around the theme "**Recent Advances in Diagnosis and Treatment of CNS Disorders**" thus relaying the most cutting edge findings in the field of CNS 2019. The two day meeting is going to be an event to look forward to for its enlightening symposiums & workshops from established experts of the field, exceptional keynote sessions directed by the best in the business. It will also prove to be a brilliant open door for the representatives from Universities and Institutes to cooperate with the world class researchers and an outstanding opportunity for businesses keen at expanding their global market reach. Interested individuals can confirm their participation by registering for the conference along with their colleagues. Register soon and avail exciting early bird discounts.

Market Analysis

PULSUS
WWW.PULSUSCONFERENCE.COM

The central nervous system is a complex network of thread-like nerves and cells that carry messages to and from the brain and spinal cord to various parts of the body including the sensory organs, arms, hands, legs, and feet. A neurosurgeon is a physician who specializes in the diagnosis and surgical treatment of disorders of the central and peripheral nervous system including congenital anomalies, trauma, tumors, vascular disorders, infections of the brain or spine, stroke, or degenerative diseases of the spine.

The global central nervous system drugs market was valued at around $71 billion in 2017 and is expected to reach around $82 billion in 2020. North America was the largest region in the central nervous system drugs market in 2017, accounting for nearly 40% market share. The USA was the largest country in the market in 2017, accounting for nearly 30% market share and is anticipated to grow at a CAGR of 5.9% during the forecast period. Advancements in diagnostics, therapeutics, and drug discovery techniques are primarily driving the growth of the market. Moreover, rising demand for effective therapeutic options are motivating major pharmaceutical companies to invest on R&D for the same, thus creating future growth opportunities. In addition, growing geriatric population prone to various CNS diseases including Alzheimer's and schizophrenia is expected to fuel the growth. Furthermore, the number of patients is expected to increase with increasing prevalence of CNS diseases associated with sedentary lifestyle and chronic mental disorders.

The delivery of drugs to central nervous system (CNS) is a challenge in the treatment of neurological disorders. Drugs may be administered directly into the CNS or administered systematically (e.g., by intravenous injection) for targeted action in the CNS. The major challenge to CNS drug delivery is the blood-brain barrier (BBB), which limits the access of drugs to the brain substance.

The method of delivery of a drug to the CNS has an impact on the drug's commercial potential. The market for CNS drug delivery technologies is directly linked to the CNS drug market. Values are calculated for the total CNS market and the share of drug delivery technologies. Starting with the market values for the year 2017, projections are made to the years 2022 and 2027

Target Audience

- Healthcare Faculties

About City and Venue

PULSUS
WWW.PULSUSCONFERENCE.COM

The city of Dubai is the largest and most populated city in the United Arab Emirates (UAE) and the capital city of the emirate of Dubai, UAE. The city is sometimes called “Dubai City” to prevent it from being mixed up with the emirate. Dubai has many malls and one of the most famous around the world is called Dubai Mall, which is the largest mall in the world. Dubai has lots of skyscrapers and wealthy people. Dubai International Airport is located the middle of the city. This city is a safe place for living. Dubai is a city which promotes happiness, safety and the wellbeing of its residents.

Dubai has attracted world attention through large construction projects and sports events, the world’s tallest building, the Burj Khalifa. By 1960s, Dubai’s economy was based on revenues from trade and, to a smaller extent, oil exploration concessions, but oil was not discovered until 1966. Oil revenue first started to flow in 1969. Dubai’s oil revenue helped accelerate the early development of the city, but its reserves are limited, and production levels are low: today, less than 5% of the emirate’s revenue comes from oil.
