ABOUT US

Since many years Pulsus has also been very instrumental to provide an invaluable channel for scientists and researchers to exchange ideas and research by creating a forum for discussing the possibilities of future collaborations between universities, institutions, research bodies and organizations from different countries through international conferences and meetings.

Pulsus Group is an internationally renowned medical peer-review publisher and conferences organizer established in the year 1984 publishes and hosts the work of researchers in a manner that exemplifies the highest standards in research integrity.v

With a legacy of 30 years of excellence in Medical Publishing we are endorsed by various societies like International Academy of Cardiovascular Sciences, International Society of Addiction Medicine, European Biotechnology Thematic Network Association, World Federation of Paediatrics Intensive and Critical Care Societies, World Association of Medical Sciences, International Society for Ceramics in Medicine, Thalassaemia International Federation and World Association of Integrated Medicine to nurture the research and development for the beneficence of society.

MARKET ANALYSIS

Drug delivery technologies improve the efficacy and safety of a drug by controlling the rate, time, and place of drug release in the body. This market is highly competitive and is witnessing rapid growth due to the development of numerous new routes of drug delivery. The global pharmaceutical industry is research-intensive, with innovative firms spending on average about 15% of their sales on R&D. Also, the increasing R&D expenditure on early-stage development, as well as an increase in the number of potential drugs in the preclinical phase, is driving the demand for preclinical services among life science companies.

The global pharmaceutical drug delivery market is projected to reach USD 2,206.5 billion by 2026, at a CAGR of 5.9% during the forecast period. Growth in the pharmaceutical drug delivery market can largely be attributed to factors such as the rising prevalence of chronic diseases, the growing biologics market, increasing investments in pharmaceutical R&D, and increasing technological advancements. The rising demand for biosimilars & biologics and self-administration & home care provides a wide range of growth opportunities for key players in the market.

ABOUT VENUE

Edinburgh is Scotland's second most populous city and the seventh most populous in the United Kingdom. It lies at the heart of the Edinburgh and South East Scotland city region comprising East Lothian, Edinburgh, Fife, Midlothian, Scottish Borders and West Lothian. It is a city like no other. A capital city where old meets new in a seamless blend of architectural splendour, romance and inspirational history. A connected city with a global outlook, Scotland's capital is a must visit destination for visitors from all over the world.

It is the second largest financial centre in the United Kingdom. The city has long been a centre of education, particularly in the fields of medicine.

The city is also famous for the Edinburgh International Festival and the Fringe, the latter being the world's largest annual international arts festival.

It is a renowned centre of excellence in sectors like life sciences, energy, technology, education, finance and the creative industries.

Edinburgh's famed year-round festivals programme helps to attract more than 4m visitors each year, and collectively they make a huge contribution to the quality of life, international reputation and economic vitality of Edinburgh and Scotland.

Edinburgh's reputation as a 'must visit' city means it has among highest levels of hotel occupancy and RevPAR figures in Europe. International hotel brands continue to invest in the city, growing portfolios or enhancing their existing offer.
