MARKET ANALYSIS

With increase in prevalence of ear, nose and throat disorders (ENT) in geriatric people the demand of ENT devices expected to drive the ENT devices industry rapidly over the upcoming years. Expanding levels of healthcare awareness among patients and healthcare professionals expected to increase the growth of the market over the forecast period.

Presence of sophisticated healthcare infrastructure in the communities, favourable government initiatives led to growth and demand for ENT devices across the under developed countries due to the extensive research and development targeted at developing technologically advanced products.

Importance and scope :

Otorhinolaryngology is the branch of medicine deals with diagnosis, treatment and other problems related to ears, nose and throat, as well as the head and neck, mouth, sinuses, and larynx. Increasing use of some of the electric systems is partially caused by the growing attractiveness of access control systems which take less time for diagnosis, treatment and fewer damages during the time of surgery with minute pain. Increasing age leads to increase risk for otorhinolaryngology disorders. This results in the use of advanced laser and radiofrequency technology during surgical and diagnostic procedures and is expected to drive ENT devices market size rapidly in coming forecast periods.

ABOUT VENUE

Dubai is the most populous city in the United Arab Emirates (UAE). It is located on the southeast coast of the Persian Gulf and is one of the seven emirates that make up the country. The city of Dubai is located on the emirate's northern coastline and heads up the Dubai-Sharjah-Ajman metropolitan area. Dubai is to host World Expo 2020.

Dubai has emerged as a global city and business hub of the Middle East. It is also a major transport hub for passengers and cargo. By the 1960s, Dubai's economy was based on revenues from trade and, to a smaller extent, oil exploration concessions, but oil was not discovered until 1966. Oil revenue first started to flow in 1969. Dubai's oil revenue helped accelerate the early development of the city, but its reserves are limited, and production levels are low: today, less than 5% of the emirate's revenue comes from oil. The emirate's Western-style model of business drives its economy with the main revenues now coming from tourism, aviation, real estate, and financial services. Dubai has recently attracted world attention through many innovative large construction projects and sports events. The city has become iconic for its skyscrapers and high-rise buildings, in particular the world's tallest building, the Burj Khalifa.
