10 TH INTERNATIONAL CONFERENCE ON

OTOLARYNGOLOGY: ENT SURGERY

NOVEMBER 06-08, 2023 | SINGAPORE

https://ent.pulsusconference.com/

INVITATION

ENT 2023

Dear distinguished guests and esteemed colleagues,

It is with great pleasure that I welcome you to the 10th International Conference on Otolaryngology: ENT Surgery to be held in Singapore on November 6-8, 2023. This conference promises to be an exciting opportunity for us to come together and share knowledge, experience, and ideas in the field of Otolaryngology.

Our ENT 2023 Conference is designed to bring together renowned experts, experienced clinicians, and young researchers from around the world to share their insights and latest findings in the management of ENT Surgery. The program will feature keynote presentations, plenary sessions, and workshops that will explore the latest advances in diagnosis, treatment, and surgical techniques.

We are delighted to have such an esteemed group of speakers and participants joining us for this Otolaryngology Conference. They will be presenting on a wide range of topics, including pediatric otolaryngology, head and neck surgery, rhinology, and laryngology, among others.

Our conference venue, in the heart of Singapore, provides a beautiful setting to share knowledge and forge new relationships. We hope that you take advantage of the opportunity to explore the city, enjoy its culture and cuisine, and make new friends and colleagues.

We look forward to welcoming you to Singapore and to the ENT Surgery Conference. We hope that you will find this conference to be both informative and enjoyable and that you leave with new insights and inspiration that will further your work and enhance patient care.

Regards,

Amber Green | ENT 2023

MARKET ANALYSIS

Ear, nose, and throat (ENT) devices are special equipment used for detection, treatment or surgical procedure of any condition related to the ear, nose or throat. They also refer to artificial materials and prosthetic devices used to restore any dysfunction of the ears, nose and throat or any problems with hearing, smelling or speaking.

Minimally invasive surgical techniques involve the use of advanced and thin ENT devices in nasal, ear, and throat. The popularity of these types of surgeries is increasing because they are associated with minimal tissue damage, a quicker recovery, less irritation, and less scarring. ENT instruments available in the market are endoscopes, hearing aids and implants, handheld surgical devices, balloon dilation devices for sinus, CO2 lasers, image-guided surgery systems, ear tubes, and voice prosthesis devices.

Global ENT devices market was valued at €12.37 billion in 2015, and is expected to reach €21.36 billion by 2022, growing at a CAGR of 8.1% during the forecast period.

Singapore, officially the Republic of Singapore, is an island country and city-state in maritime Southeast Asia. It is located about one degree of latitude (137 kilo meters or 85 miles) north of the equator, off the southern tip of the Malay Peninsula, bordering the Strait of Malacca to the west, the Singapore Strait to the south, the South China Sea to the east, and the Straits of Johor to the north. The country's territory is composed of one main island, 63 satellite islands and islets, and one outlying islet; the combined area of these has increased by 25% since the country's independence as a result of extensive land reclamation projects. It has the third highest population density in the world, although there are numerous green and recreational spaces as a result of urban planning. With a multicultural population and in recognition of the cultural identities of the major ethnic groups within the nation, Singapore has four official languages – English, Malay, Mandarin, and Tamil. English is the lingua franca, with its exclusive use in numerous public services. Multi-racialism is enshrined in the constitution and continues to shape national policies in education, housing, and politics.
