Theme: Exploring the Latest Trends and Techniques in Otolaryngology

2ND INTERNATIONAL CONFERENCE ON

OTOLARYNGOLOGY: ENT SURGERY

APRIL 18-19, 2024 | DUBAI, UAE

https://ent.pulsusconference.com/

INVITAION

ENT 2024

Dear distinguished guests and esteemed colleagues,

It is with great pleasure that I welcome you to the 2nd International Conference on Otolaryngology: ENT Surgery to be held in Dubai on April 18–19, 2024. This conference promises to be an exciting opportunity for us to come together and share knowledge, experience, and ideas in the field of Otolaryngology.

Our ENT 2024 Conference is designed to bring together renowned experts, experienced clinicians, and young researchers from around the world to share their insights and latest findings in the management of ENT Surgery. The program will feature keynote presentations, plenary sessions, and workshops that will explore the latest advances in diagnosis, treatment, and surgical techniques.

We are delighted to have such an esteemed group of speakers and participants joining us for this Otolaryngology Conference. They will be presenting on a wide range of topics, including pediatric otolaryngology, head and neck surgery, rhinology, and laryngology, among others.

Our conference venue, in the heart of Dubai, provides a beautiful setting to share knowledge and forge new relationships. We hope that you take advantage of the opportunity to explore the city, enjoy its culture and cuisine, and make new friends and colleagues.

We look forward to welcoming you to Dubai and to the ENT Surgery Conference. We hope that you will find this conference to be both informative and enjoyable and that you leave with new insights and inspiration that will further your work and enhance patient care.

Regards,

Organizing Committee | ENT 2024

MARKET ANALYSIS

Ear, nose, and throat (ENT) devices are special equipment used for detection, treatment or surgical procedure of any condition related to the ear, nose or throat. They also refer to artificial materials and prosthetic devices used to restore any dysfunction of the ears, nose and throat or any problems with hearing, smelling or speaking.

Minimally invasive surgical techniques involve the use of advanced and thin ENT devices in nasal, ear, and throat. The popularity of these types of surgeries is increasing because they are associated with minimal tissue damage, a quicker recovery, less irritation, and less scarring. ENT instruments available in the market are endoscopes, hearing aids and implants, handheld surgical devices, balloon dilation devices for sinus, CO2 lasers, image-guided surgery systems, ear tubes, and voice prosthesis devices.

Global ENT devices market was valued at €12.37 billion in 2015, and is expected to reach €21.36 billion by 2022, growing at a CAGR of 8.1% during the forecast period.
