Market Analysis

PULSUS
WWW.PULSUSCONFERENCE.COM

The global market for cardiovascular devices reached nearly $42.4 billion in 2020 and is estimated to reach $59.1 billion by 2025, at a compound annual growth rate (CAGR) of 6.9% for the period of 2020-2025. The market for cardiac biomarkers is estimated to reach $7.2 billion by 2018, at a compound annual growth rate (CAGR) of 12.8% from 2013 to 2018.

The number of cardiac procedures performed increased steadily over the five years to 2017, providing overwhelming demand for operators in the Cardiologists industry. In particular, the growing burden of cardiovascular disease fostered increased demand. In addition, increasing rates of obesity and an aging baby-boomer population have resulted in an uptick in heart-related conditions. As a result, the early onset of chronic health conditions, such as heart disease, hypertension, and diabetes, bolstered demand for industry services. Improving economic conditions through 2022 are expected to underpin steady growth for cardiologists, though profit pressures will encourage consolidation in the industry.
