ABOUT US

Since many years Pulsus has also been very instrumental to provide an invaluable channel for scientists and researchers to exchange ideas and research by creating a forum for discussing the possibilities of future collaborations between universities, institutions, research bodies and organizations from different countries through international conferences and meetings.

Pulsus Group is an internationally renowned medical peer-review publisher and conferences organizer established in the year 1984 publishes and hosts the work of researchers in a manner that exemplifies the highest standards in research integrity.

With a legacy of 30 years of excellence in Medical Publishing we are endorsed by various societies like International Academy of Cardiovascular Sciences, International Society of Addiction Medicine, European Biotechnology Thematic Network Association, World Federation of Paediatrics Intensive and Critical Care Societies, World Association of Medical Sciences, International Society for Ceramics in Medicine, Thalassaemia International Federation and World Association of Integrated Medicine to nurture the research and development for the beneficence of society.

MARKET ANALYSIS

Gynecology and Obstetrics, sometimes known as "The Science of Women," focuses on the female reproductive system, including puberty, pregnancy, delivery, postpartum, and menopause. From the first stage through the menopausal period and beyond, gynecologists and obstetricians must deal with a wide range of challenges.

Gynecologists often conduct treatments such dilation and curettage, hysterectomy, oophorectomy, tubal hysteroscopy, diagnostic laparoscopy, appendectomy, and cervical excision, all of which present a number of obstacles. Additionally, they had to calmly perform the risky process of birthing as well as treat both acute and chronic medical disorders. The worldwide gynecologic device market is set to reach $2.1 billion in 2021, with mechanical uterine tissue removal devices experiencing the highest rise in demand. Despite COVID19, it is anticipated that the size of the worldwide market would rise during the projection period and surpass $3.3 billion in 2027.

According to investigations, there were 160 maternal fatalities attributable to COVID-19, which have been reported globally, with the majority occurring in middle-income countries and acting as a barrier to the reduction of maternal mortality. Recent investigations from Sweden and the US have shown that pregnant and perinatal women are being put under increased risk of technical hitches associated with COVID-19, contrary to initial studies that suggested pregnant women were not at a higher risk of complications due to COVID - 19 infection.

ABOUT VENUE

Paris is the capital and largest city of France. In a northern bend of the Seine in north-central France, the two islands Île Saint-Louis and the larger Île de la Cité make up the oldest part of Paris. The normal oceanic climate of Western Europe is affected by the North Atlantic Current in Paris. All year long, the climate is pleasant and moderately humid. Paris has long been one of Europe's primary centres for commerce, diplomacy, fashion, science, and the arts. Among the most visited sites in downtown Paris are The Louvre, Sainte-Chapelle, and Notre-Dame Cathedral. On the left bank, southwest of the city, lie Les Invalides, home to Napoleon's grave, and the Eiffel Tower. Paris has drawn artists from all over the world for centuries, who flock to the city to train and find inspiration in its extensive collection of creative resources and galleries. As a result, Paris earned the moniker "City of Art." Particularly in sculpture and reliefs, Italian painters had a significant impact on the growth of art in Paris in the 16th and 17th century. During the French Baroque and Classical eras, when painting and sculpture were the glory of the French monarchy, the French royal family hired several Parisian painters to beautify their palaces.
