Award Ceremony	

Tourist Attractions

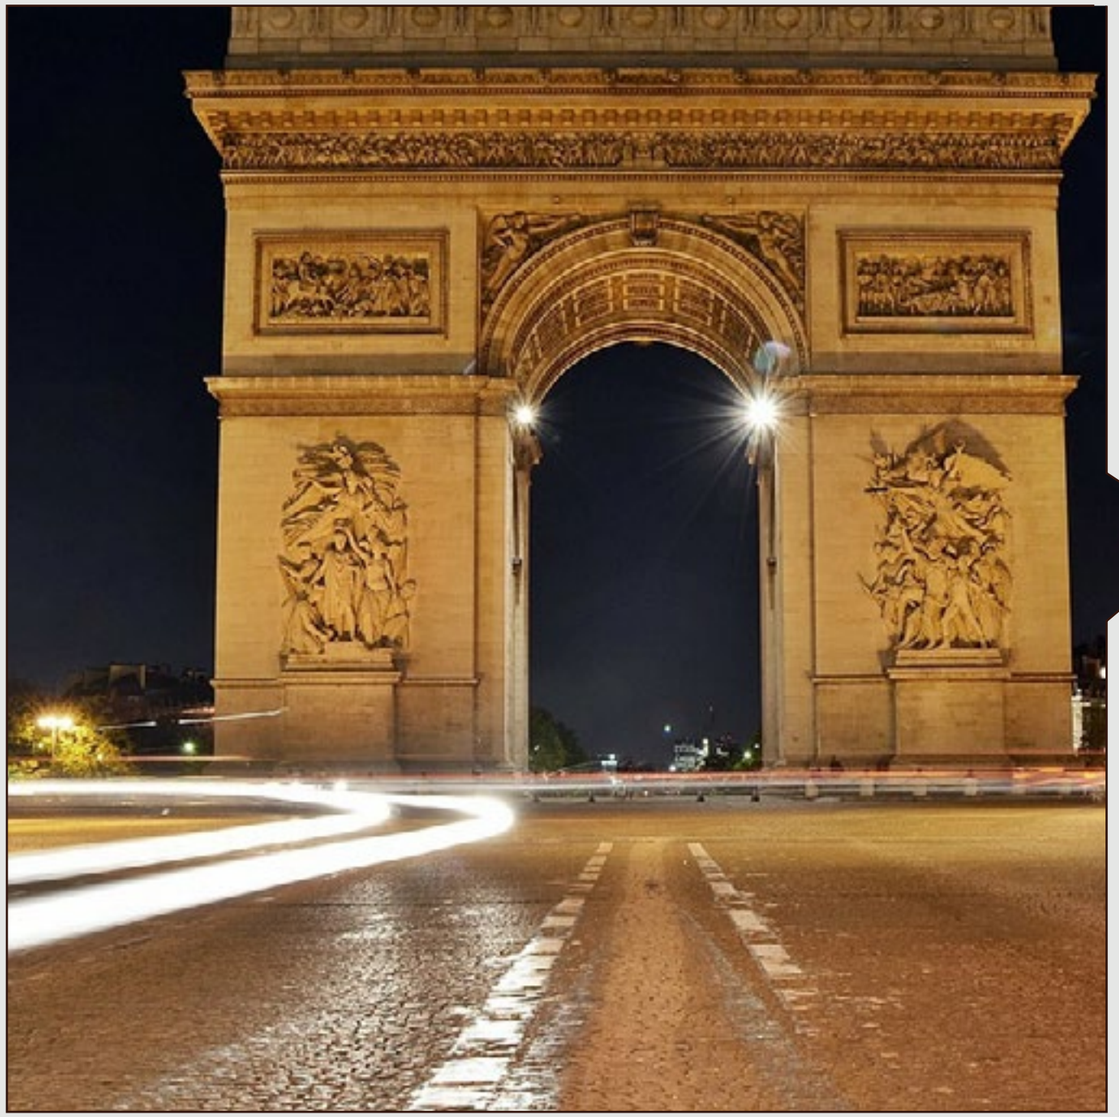

Venue

The Eiffel Tower was built by Gustave Eiffel in 1889 with 6,300 tons (13,900,000 pounds) of iron – 18,000 pieces of iron and 2.5 million rivets. At 300 meters tall, it was the tallest tower in the world for a long time. More than 6 million people visit every year. There are three levels you can visit and the tallest one is 2nd from the ground. It was built for an exhibition, but the French government wanted to demolish it. With increasing popularity, it remained so. The Louvre is a museum that houses some of the most famous, old works of art, such as the Mona Lisa and the Venus de Milo. This building was built as a residence for French kings. With 60,000 square meters (650,000 sq. ft) of exhibition space, the Louvre is the third largest museum in the world. It is the most visited art museum in the world, with more than 5 million people visiting it every year.

The museum used to be a railway station, but is now an art museum. Most of the art in the Museum d'Orsay was created between 1848 and 1915. It is newer than Louvre art. The Moulin Rouge was a multi-show cabaret and opened in 1889. It's in Montmartre - an area of Paris with an amazing night life. At the Moulin Rouge, women danced the famous French Cancan. Champs-Elysées is probably the most famous street in Paris and the most famous street in the world. Lots of places to shop and eat. At one end of the Champs-Elysées is the Arc de Triomphe. The Sacre-Coeur Basilica is a large church dedicated to the Sacred Heart.
