INVITAION

HUMAN GENETICS 2022

PULSUS brings a new spin on conferences by presenting the latest scientific improvements in your field. Listen to motivating keynotes from thought leaders or rub elbows with pioneers across the globe. Paris is all set for an amazing event as PULSUS proudly presents the “7th International Conference on Human Genetics and Genetic Disorders”, scheduled to be held on December 05-06, 2022 in Dubai, UAE.

PULSUS cordially welcomes researchers, academicians, students, and business professionals in the field of human genetics and genetic disorders from around the world to participate in the upcoming Human Genetics 2022. The meeting for this year will revolve around the theme “Perception towards the current automation in genetics,” thus relaying the most cutting-edge findings in the field of genetics. The two-day meeting is going to be an event to look forward to for its enlightening symposiums and workshops from established experts in the field, as well as exceptional keynote sessions directed by the best in the business. It will also be a fantastic opportunity for representatives from universities and institutes to collaborate with world-class researchers, as well as an outstanding opportunity for businesses looking to expand their global market reach. Interested individuals can confirm their participation by registering for the conference along with their colleagues. Register soon and avail exciting early bird discounts.

ABOUT VENUE

Dubai is the most populous and largest city in the United Arab Emirates (UAE). It is situated on the southeast shoreline of the Persian Gulf and is one of the seven emirates that make up the nation. The city of Dubai is situated on the emirate's northern coastline and heads up the Dubai-Sharjah-Ajman metropolitan territory. Dubai has developed as a global city and business center point of the Middle East. It is likewise a noteworthy transport center point for travelers and freight. Dubai has attracted world attention through large construction projects and sports events, the world's tallest building, the Burj Khalifa. By 1960s, Dubai's economy was based on revenues from trade and, to a smaller extent, oil exploration concessions, but oil was not discovered until 1966. Oil revenue first started to flow in 1969. Dubai's oil revenue helped accelerate the early development of the city, but its reserves are limited, and production levels are low: today, less than 5% of the emirate's revenue comes from oil. The emirate's Western-style model of business drives its economy with the main revenues now coming from tourism, aviation, real estate, and financial services. Dubai has recently attracted world attention through many innovative large construction projects and sports events. The city has become iconic for its skyscrapers and high-rise buildings. Dubai provides a world-class education and enormous job opportunities. The most wellknown universities in Dubai are American University in Dubai, Hult International Business School, Al Ghurair University, The American College of Dubai, the University of Wollongong in Dubai and British University in Dubai offering courses in Business Administration, Engineering, Architecture and Interior Design.
