MARKET ANALYSIS

The global veterinary services market size was valued at USD 91.78 billion in 2017. It is anticipated to witness a CAGR of 5.6% during the forecast period. Rising prevalence of zoonotic and food-borne diseases is one of the key trends stimulating market growth. Veterinary services play an important role in protecting animal health and welfare and ensuring safety of animals during transportation.

In addition, it also aids safeguarding public health and ensuring food safety across the globe. According to the article published by the Organization for Animal Health (OIE), demand for animal source foods is growing globally. This includes demand for meat, which is expected to reach 445 million tons by 2029.

Furthermore, sharp rise in pet population globally in recent times has also led to greater demand for veterinary services. Veterinarians and veterinary service providers are undertaking consistent efforts to ensure animal welfare, thus encouraging pet owners to incline towards these services.
