MARKET ANALYSIS

The pharmaceutical industry is projected to experience significant growth worldwide in the coming years. The global pharmaceuticals market is anticipated to expand at a CAGR of 9.1% from $1454.66 billion in 2021 to $1587.05 billion in 2022. This growth is attributed to several factors, including an increasing number of people suffering from diseases, a growing aging population, and a rising number of prescriptions. The European pharmaceutical market is expected to expand at a CAGR of 5.4% from 2021 to 2028, with Germany leading the market with over 49.4 billion euros in total revenue in 2021.

Berlin, the capital city of Germany, is home to several renowned universities and research institutions that offer a range of programs in Pharmaceutical Sciences. The city is also home to several major pharmaceutical companies, including Bayer, Pfizer, and Boehringer Ingelheim, as well as several small and medium-sized enterprises (SMEs) in the sector. The demand for pharmaceutical products and services in Berlin is driven by factors such as an aging population, the increasing prevalence of chronic diseases, and the ongoing COVID-19 pandemic. Therefore, there is a growing need for research and development in the pharmaceutical sector and for skilled professionals in areas such as drug discovery, clinical research, and regulatory affairs.
