30 YEARS OF EXCELLENCE IN MEDICAL PUBLISHING

Pathology is a vast spectrum in the medical specialty that encompasses the study of diseases in depth to have an understanding of the causes and effects. The word Pathology comes from the Greek words “pathos” meaning “disease” and “logos” meaning “study”. Four mechanisms related to the disease condition are studied: the cause, pathogenesis, morphogenesis and clinical manifestations of the disease. Every aspect relating to diagnosis and treatment of the disease, patient care, the use of novel techniques and prevention of disease condition is taken into account for the well-being of the patient. Clinical Laboratory Medicine involves diagnostic tests and examination of tissues and body fluids to determine patient health. Innovations in this field are rapidly growing which provides advanced and better health care for the society. A clinical lab technician carries out diagnostic tests under the guidance of a pathologist and generates reports of patient data.
