ABOUT VENUE

England to its advantage, having always been a densely populated and wealthy area. The city of London was founded by the Romans and their rule extended from 43 AD to the fifth century AD, when the Empire fell. During the third century, Londinium, the name given to the town by the Romans, had a population of 50,000, mainly due to the influence of its major port. For many years, England had no capital city. However, the institutions of the central government were moved to Westminster, close to London. This and the rise of trade in the area were two decisive factors in London's emergence as the capital of England. Most of current London is from the Victorian period. Up until the early years of the nineteenth century, the capital was confined to the boundaries of the original Roman city, as well as Westminster and Mayfair, and was surrounded by fields. Be that as it may, the Industrial Revolution drew millions of people to London, expanding the city. People can find everything they want and more in London—storied monuments, pub culture, English slang, and a youthful, cosmopolitan atmosphere. Around every corner is an intriguing piece of history. To get a sense of Londoners today, duck into the Tube to people-watch as you ride across the city. Head to hip street markets, fashionable shops, vintage record stores, buzzing West End clubs, or catch a rugby game. Free museums, rooftop movie nights, and pop-up art shows make London a little easier on the wallet as well.
