Market Analysis

PULSUS
WWW.PULSUSCONFERENCE.COM

Metabolomics is the systematic study of the unique chemical fingerprints that specific cellular processes leave behind specifically, the study of their small-molecule metabolite profiles. The new analytical science has progressed within the last years particularly about improvements in mass spectrometry-based detection, now allowing highly robust, reproducible, selective and sensitive qualitative or quantitative analysis of endogenous metabolites.

The metabolomics market is globally segmented into product and service, application, and indication. The market has witnessed significant growth primarily due to the increasing need for accurate diagnosis of diseases, rising demand for personalized medicine, and emergence of advanced technologies.
