Invitation

PULSUS brings in a new spin on conferences by presenting the latest scientific improvements in your field. Listen to motivating keynotes from thought leaders, or rub elbows with pioneers across the globe. Lisbon is all set for an amazing event as PULSUS proudly presents the "5th World Congress on Microbial Biotechnology" slated on September 17-18, 2018 at Lisbon, Portugal.

PULSUS cordially welcome researchers, academicians, students and business professionals in the field of Microbial Biotechnology from around the world to participate in the upcoming Microbial Biotechnology 2018. The meeting for this year will revolve around the theme "Current Trends and Technological Challenges in Microbial Biotechnology" thus relaying the most cutting edge findings in the field of Microbial BiotechnologyResearch. The two day meeting is going to be an event to look forward to for its enlightening symposiums & workshops from established experts of the field, exceptional keynote sessions directed by the best in the business. It will also prove to be a brilliant open door for the representatives from Universities and Institutes to cooperate with the world class researchers and an outstanding opportunity for businesses keen at expanding their global market reach. Interested individuals can confirm their participation by registering for the conference along with their colleagues. Register soon and avail exciting early bird discounts.

About PULSUS

Pulsus Group is an internationally renowned medical peer-review publisher and conferences organizer established in the year 1984 publishes and hosts the work of researchers in a manner that exemplifies the highest standards in research integrity.

PULSUS conferences act as a catalyst on the research trends that really matter and spurring their adoption by exploring and disseminating cutting-edge information. Thus, mainly adhere to stringent peer-review procedure with a view to set an example in promoting standard medical research with integrity. As an ardent supporter of medical publishing, Pulsus Group closely associates with the Canadian and other international medical research associations like Canadian Society of Plastic Surgeons, Canadian Society for Aesthetic Plastic Surgery, Groupe pour l'Avancementde la Microchirurgie Canada, Canadian Society for Surgery of the Hand. It publishes a wide range of medical journals that focus on medical specialties like cardiology, Integrative Medicine, Surgery and Reproductive Medicine.

Pulsus Conferences explore the future by connecting minds and spreading brilliance at Pulsus Group annual conferences & meetings. Meet your colleagues, discuss your specialty, spread and aid, learn & grow in association with 1000+ scientific societies from The USA, Europe, The Middle East, Africa and The Asia-Pacific region. Pulsus group is closely associated with globally renowned academic and research societies.

Pulsus Conferences believe that true technology and innovation depends on hearing from, and listening to, people with a variety of perspectives. Pulsus Conferences enhances the technology for people from underrepresented groups by actively recruiting diverse speakers for our events, signing up a broad variety of authors for journals and videos, and taking part in ongoing conversations about the value of diversity in the communities we serve.

Microbial Biotechnology can be defined as one of the aspect of biotechnology which involves the use of the microorganisms or their products. Microbial biotechnology is also referred to as industrial microbiology because of its new discoveries made in the field of genetic engineering. Industrial microbiology was initially established for the alcoholic fermentation process to produce wine and beer, and later it was used for microbial production of antibiotics, enzymes, butanol, citric acids etc. Recent research has shown that microbial biotechnology plays major important role in improved vaccine production and disease-diagnostic tools. Some of the application of microbial biotechnology includes food safety and security, value-added products, human nutrition and functional foods, agricultural science, plant and animal protection etc. Agricultural microbiology is the present research field which includes general microbiology, microbial ecology and agricultural biotechnologies. It is mainly focused on plants and importance of microorganisms in relation to agriculture and environmental health. There is broad application of sustainable agriculture which is due to the genetic dependency of plants in the field of microbial biotechnology.

Target Audience

- Microbiologists
- Biotechnologists
- Pharmaceutical Scientists
- Inter-disciplinary Microbial Scientists
- Clinical Research Organization
