Pulsus Group is an internationally renowned medical peer-review publisher and conferences organizer established in the year 1984 publishes and hosts the work of researchers in a manner that exemplifies the highest standards in research integrity.

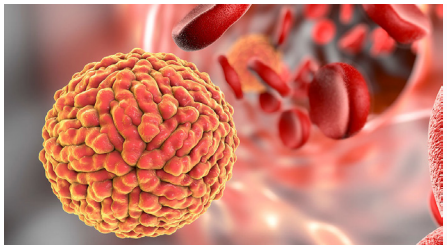

PULSUS conferences act as a catalyst on the research trends that really matter and spurring their adoption by exploring and disseminating cutting-edge information. Thus, mainly adhere to stringent peer-review procedure with a view to set an example in promoting standard medical research with integrity. As an ardent supporter of medical publishing, Pulsus Group closely associates with the International Union of Microbiological Societies, International Society for Antiviral Research, International Society for Microbial Ecology, Federation of European Microbiological Societies, European Society of Clinical Microbiology and Infectious Diseases, British Infection Association

Pulsus Conferences explore the future by connecting minds and spreading brilliance at Pulsus Group annual conferences & meetings. Meet your colleagues, discuss your specialty, spread and aid, learn & grow in association with 1000+ scientific societies from The USA, Europe, The Middle East, Africa and The Asia-Pacific region. Pulsus group is closely associated with globally renowned academic and research societies.

Pulsus Conferences believe that true technology and innovation depends on hearing from, and listening to, people with a variety of perspectives. Pulsus Conferences enhances the technology for people from underrepresented groups by actively recruiting diverse speakers for our events, signing up a broad variety of authors for journals and videos, and taking part in ongoing conversations about the value of diversity in the communities we serve.

Market Analysis

PULSUS
WWW.PULSUSCONFERENCE.COM

Microbiology is the study of microorganisms such as bacteria, algae, fungi, viruses and etc. Microorganisms are unicellular, acellular and multicellular in nature. The field of microbiology includes several sub-disciplines such as bacteriology, virology, mycology, parasitology, protozoology, nematology etc. Infection should be diagnosed and treated at the premature stage to avoid further complications. The development of new techniques in the diagnosis and treatment should decrease the time consumption to find the infection caused by a particular microbe.

Microbiology 2020 has been organized in such a manner with a number of tracks to choose from every segment and provide a unique opportunity to meet up with peers from both the industry and academia and establish a scientific network.
