MARKET ANALYSIS

For years, AHSL has offered microbiological and biochemical testing services to the best resorts, eateries, shopping centres, and supermarkets in the UAE. Clients in the UAE have frequently requested assessments of the health concerns in private and public structures using the identification of Legionella sp. Our testing facilities are also used by merchants and producers of food products in order to safeguard the reputation and brand integrity of their products.

In the UAE, AHSL now operates two complete laboratories that are each individually accredited. Our ISO/IEC 17025: 2005 accreditations encompass a wide range of microbiological testing. The AHSL facilities are outfitted with cutting-edge apparatus for the detection and counting of pathogens from food and environmental samples, including Mini VIDAS, PCR, Biology Speciation Analyzer, and other devices.

The market for applied microbial science was valued at over USD 24.3 billion in 2017 and is anticipated to surpass USD 675.2 billion by 2024, growing at a 7.9% CAGR. Global Market Insights uses a unique combination of mandatory and optional tests, with permission and adjustments, to reduce discrepancies and provide the most accurate analysis of the industry

TARGET AUDIENCE

- Microbiologists Doctors
- Microbiologists Professors
- Microbiologists Assistant Professors
- Healthcare Researchers
- Ph.D Students
- Allied Health Professionals
- Industrialist

WHO SHOULD ATTEND

- Microbiologists
- Students Researchers
- Inventers and Professors
- Women's Healthcare Researchers
- Medical Colleges
- Healthcare Associations and Societies

ABOUT VENUE

Dubai is the most populated city in the United Arab Emirates (UAE) and the capital of the Emirate of Dubai, the most populated of the 7 monarchies which together form the United Arab Emirates. Established in the 18th century as a small fishing village, the city grew rapidly in the early 21st century with a focus on tourism and luxury, having the second most five-star hotels in the world, and the tallest building in the world, the Burj Khalifa, which is over a half a mile tall.

In the eastern Arabian Peninsula on the coast of the Persian Gulf, it is also a major global transport hub for passengers and cargo. Oil revenue helped accelerate the development of the city, which was already a major mercantile hub. A centre for regional and international trade since the early 20th century, Dubai's economy relies on revenues from trade, tourism, aviation, real estate, and financial services.Oil production contributed less than 1 percent of the emirate's GDP in 2018. The city has a population of around 3.4 million (as of 2021).

During the 1970s, Dubai continued to grow from revenues generated from oil and trade, even as the city saw an influx of immigrants fleeing the Lebanese civil war. Border disputes between the emirates continued even after the formation of the UAE; it was only in 1979 that a formal compromise was reached that ended disagreements. The Jebel Ali port, a deep-water port that allowed larger ships to dock, was established in 1979. The port was not initially a success, so Sheikh Mohammed established the JAFZA (Jebel Ali Free Zone) around the port in 1985 to provide foreign companies unrestricted import of labour and export capital. Dubai airport and the aviation industry also continued to grow.
