MARKET ANALYSIS

The global market for general surgery devices is expected to grow at a CAGR of 8.29% from 2022 to 2030, driven by rising patient awareness and technological advancements. Orthopedic surgery holds the largest market share in 2021, followed by cardiology due to increasing cardiovascular disorders. Hospitals dominate the market with over 58.85% of overall revenue. North America generated the most revenue in 2021, contributing over 39.90% of the total revenue. The market for general surgical devices in Europe is expected to expand at a CAGR of approximately 6.1% during the forecast period, with France leading the market with a value of €15.7 billion in 2019. The French market is expanding due to rising demand for minimally invasive devices and increasing healthcare costs. Handheld surgery instruments are in demand in France as surgical procedures increase. French companies are developing cutting-edge medical technologies and devices.
