MARKET ANALYSIS

The global nephrology and urology devices market was worth USD 5.24 billion in 2021 and it is predicted to increase at a compound annual growth rate (CAGR) of 6.8% between 2022 and 2030. So the Nephrology 2023 increasing prevalence of chronic kidney diseases (CKDs), along with an ageing population, is a significant contributing driver for the market. According to National Kidney Foundation estimates, chronic kidney disorders impact 10.0% of the global population. As the patient population seeks treatment for this illness grows, so does the total need for nephrology and urology equipment.

Furthermore, Nephrology 2023 market is likely to be pushed by a large geriatric population, which is predisposed to a variety of ailments, including renal and urinary problems. According to the WHO, the worldwide population of people aged 65 and over is anticipated to grow from 7% in 2000 to 16% in 2050. Old age is regarded as one of the most significant risk factors for the development of many medical disorders. Aging also affects the immune system, making patients more susceptible to diseases such as renal problems, diabetes, prostate cancer, and urinary retention..
