# Market Analysis

In neurology over the last 15 years many complex diseases, disorders are treated successfully. This optimistic approach has given many pharmaceutical, contract research organizations a will to develop more drugs and clinical testing. This era the sophistication of clinical laboratories, clinical researchers and modern nano research enhance the market of neurology Mortality rate from the neurological diseases form 1990 to 2015 was increased by 37%. Alzheimer's disease (2.4%), Parkinson's Disease (15.7%), brain and nervous system cancers (8.9%). motor neuron disease (3.1%). More number of death rate is happening in the rural areas. Investors put more effort in brain imaging, radiology and neural engineering from context to practical application due to its high efficiency. Neurological devices seem to have an elevated position in graph. Neurology 2020 channelizes the blooming advancement in the field of neurology that details about the recent non-surgical trials and research to treat Neurological disorders. This Neurology 2020 is being intended for the international neurologists and research experts to encourage the use of exploration discoveries identified which would be as an aid to the people who is being suffering from neurological disorders. Neurology 2020 consists of Oral presentation, Poster presentation and Workshop, and many interactive sessions by the Key note speakers which provide us a ray of light in the field of Neurology. # About City and Venue

Paris is the capital and most populous city of France. Paris is located in the northern central France, in a north-bending arc of the river Seine whose crest includes two islands, the Île Saint-Louis and the larger Île de la Cité, which form the oldest part of the city. Paris has a typical Western European oceanic climate which is affected by the North Atlantic Current. The overall climate throughout the year is mild and moderately wet. Paris has been one of Europe's major centres of finance, diplomacy, commerce, fashion, science, as well as the arts. The centre of Paris contains the most visited monuments in the city, including the Notre Dame Cathedral and the Louvre as well as the Sainte-Chapelle. Les Invalides, where the tomb of Napoleon is located, and the Eiffel Tower are located on the Left Bank south-west of the centre. For centuries, Paris has attracted artists from around the world, who arrive in the city to educate themselves and to seek inspiration from its vast pool of artistic resources and galleries. As a result, Paris has acquired a reputation as the "City of Art". Italian artists were a profound influence on the development of art in Paris in the 16th and 17th centuries, particularly in sculpture and reliefs. Painting and sculpture became the pride of the French monarchy and the French royal family commissioned many Parisian artists to adorn their palaces during the French Baroque and Classicism era.
