Neurology deals with the diagnosis and treatment of diseases involving the nervous system. Common tests in neurology includes studies such as computed axial tomography (CAT) scans, magnetic resonance imaging (MRI), and ultrasound of major blood vessels of the head and neck. Neuroscience which is also known as Neural Science is a multidisciplinary field that deals with the study of the nervous system. Social neuroscience is concerned with the understanding of how biological systems implement social processes and behavior. Some of the neurological conditions include headaches, radiculopathy, neuropathy, stroke, dementia, seizures and epilepsy, Alzheimer's disease, Parkinson's disease, Tourette's syndrome, multiple sclerosis, head trauma, sleep disorders, neuromuscular diseases, and various infections and tumors of the nervous system.

Rome is the capital city of Italy and of the Lazio region. With 2.9 million residents in 1,285 km (496.1 sq mi), it is also the country's largest and most populated commune and fourth-most populous city in the European Union by population within city limits. The city is located in the central-western portion of the Italian Peninsula, within Lazio (Latium), along the shores of Tiber River. Vatican City is an independent country within the city boundaries of Rome, the only existing example of a country within a city: for this reason Rome has been often defined as capital of two states. Rome today is one of the most important tourist destinations of the world, due to the incalculable immensity of its archaeological and artistic treasures, as well as for the charm of its unique traditions, the beauty of its panoramic views, and the majesty of its magnificent "villas" (parks)
