Market Analysis

The previous Market Research Report on Nursing and Residential Care Facilities is an in-depth evaluation of the industry and will provide you with the key insights, trends and benchmarks you would like to make a broad and comprehensive diagnostic and understanding of the business and company. Over the 5 years to 2017, the requirement for services provided by medical aid facilities is predicted to grow steady beside revenue. During the five-year period, the continuing aging of the population has spurred demand for business services because the range of adults aged 65 and older is predicted to extend. However, an unstable compensation model and changes enforced by healthcare reform have initiated a shift from nursing homes to at-home managed care and community care services. Since these services are completed at home, their growth represents a possible threat to business operators. In 2016, industry sales were $238.2 billion. Business growth over the past 3 years, the industry has grown at an annual rate of 4.1%. Company growth there is 38,615 corporations within the business. Sales per company in 2016, the typical sales per company was $6.2 million.
