MARKET ANALYSIS

The market for orthopedic devices was estimated to be worth USD 40.9 billion in 2021, and it is projected to expand at a CAGR of 3.1% from 2022 to 2030. The market is growing as a result of the high prevalence of orthopedic conditions like degenerative bone disease, the aging population growth, and the rise in traffic accidents. According to information from the Global Burden of Disease report from 2021, 1.71 billion people worldwide experience musculoskeletal conditions. As a result, the market is likely to be driven by an increase in musculoskeletal disorders between 2022 and 2030.

ABOUT VENUE

Italian city of Rome Roma is the capital of the Italian nation, the Lazio region, and the Roma Provincia (province). Rome is situated on the Tiber River in the centre of the Italian peninsula, about 24 kilometres (15 miles) inland from the Tyrrhenian Sea. Rome, also known as the Eternal City, was once the seat of an ancient republic and empire whose armies and polity defined the Western world in antiquity and left seemingly irrevocable imprints afterward. It is also the spiritual and physical home of the Roman Catholic Church as well as the location of some of the highest points of artistic and intellectual achievement. Today, Rome serves as a political and religious hub as well as a memorial to the past's imaginative imagination.
