Orthopedics

2026

Market Analysis

The global orthopedic implants and surgical devices market is set to grow at a CAGR of around 6.2% from 2025 to 2032, driven by rising demand for joint replacement, fracture fixation, and spine stabilization. Orthopedic robotics and navigation systems are rapidly gaining adoption for higher precision and better recovery outcomes. Meanwhile, advances in biologics—such as stem cell therapy and growth factors—are creating new possibilities for cartilage regeneration and soft tissue repair.
