Otorhinolaryngology

2026

Market Analysis

The global Otorhinolaryngology market has experienced consistent growth over the past five years and is projected to continue expanding at a compound annual growth rate (CAGR) of approximately 6–8% during the forecast period. This growth is driven by the rising prevalence of ENT disorders, technological innovations, and increasing demand for minimally invasive treatments

From USD 20.8 billion in 2021, the global Otorhinolaryngology market grew to approximately USD 27.2 billion in 2025. Market expansion has been supported by the increasing adoption of minimally invasive sinus surgery, cochlear implants, AI-assisted diagnostics, robotic-assisted ENT procedures, tele-audiology, and precision medicine.
