MARKET ANALYSIS

The worldwide palliative care market is anticipated to grow at a noteworthy rate of 9% during the forecasted period, rising from USD 4.18 billion in 2021 to USD 7.11 billion in 2028. The application estimates that the cancer sub-segment will account for around 45% of market revenue in 2021 and will grow at an average annual rate of 8.7% throughout the course of the forecast year. Because cancer diagnosis and treatment take up half of the unit, there is a growing need for palliative care. The hospice resident care sub-segment is anticipated to expand at the fastest pace of 12.3% percent over the forecast period, with a market share of 15.4%. The market income for this category is influenced by the rising number of residential hospices and the increased awareness of life-threatening illnesses.
