Invitation

Pulsus conferences insist participants from all over the world clock in "**6th International Conference on Palliative Care Medicine & Hospice Nursing"** during **June 26-28, 2023 | London, UK**. The theme of the conference this year is "***A Step towards Improving the Quality of Health in Palliative Care & Hospice Nursing***" which guarantees an outstanding science program supporting many esteemed speakers who are tormented by intuition Through providing access to ongoing training and networking opportunities, the conference aims to improve the practice of advancing the profession for the benefit of the people and the individual patients they represent.

Palliative Nursing 2023 is an annual gathering of palliative care consultants, health & hospice professionals and committees to debate the future of palliative care in terms of diagnosis, treatment and transition care development.

Regards
Palliative Nursing 2023
Organizing Committee

16:00-16:15	Network & Refreshments Break*
16:15-18:00	Tracks: Obstetrics and Gynaecology Palliative Care | Palliative Therapy

Tourist Attractions

Venue

London, city, capital of the United Kingdom. It is among the oldest of the world's great cities—its history spanning nearly two millennia—and one of the most cosmopolitan. By far Britain's largest metropolis, it is also the country's economic, transportation, and cultural centre.London is situated in south-eastern England, lying astride the river Thames some 50 miles (80 km) upstream from its estuary on the North Sea. In satellite photographs the metropolis can be seen to sit compactly in a Green Belt of open land, with its principal ring highway (the M25 motorway) threaded around it at a radius of about 20 miles (30 km) from the city centre. The growth of the built-up area was halted by strict town planning controls in the mid-1950s. The London familiar to international visitors is a much smaller place than that. Tourist traffic concentrates on an area defined by the main attractions, each drawing between one and seven million visitors in the course of the year: Buckingham Palace, the British Museum, the National Gallery, Westminster Abbey, Madame Tussaud's waxwork collection, the Tower of London, the three great South Kensington museums (Natural History, Science, and Victoria and Albert), and the Tate galleries. In scale, the London most tourists visit resembles the metropolis as it was in the late 18th century, a city of perhaps 10 square miles (26 square km) explorable on foot in all directions from Trafalgar Square.
