About Pulsus:

- PULSUS conferences act as a catalyst on the research trends that really matter and spurring their adoption by exploring and disseminating cutting-edge information. Thus, mainly adhere to stringent peer-review procedure with a view to set an example in promoting standard medical research with integrity. As an ardent supporter of medical publishing, Pulsus Group closely associates with the Canadian and other international medical research associations like Canadian Society of Plastic Surgeons, Canadian Society for Aesthetic Plastic Surgery, Groupe pour l'Avancementde la Microchirurgie Canada, Canadian Society for Surgery of the Hand. It publishes a wide range of medical journals that focus on medical specialties like cardiology, Integrative Medicine, Surgery and Reproductive Medicine.
- Pulsus Conferences explore the future by connecting minds and spreading brilliance at Pulsus Group annual conferences & meetings. Meet your colleagues, discuss your specialty, spread and aid, learn & grow in association with 1000+ scientific societies from The USA, Europe, The Middle East, Africa and The Asia-Pacific region. Pulsus group is closely associated with globally renowned academic and research societies.
- Pulsus Conferences believe that true technology and innovation depends on hearing from, and listening to, people with a variety of perspectives. We want our conferences, societies, associations and the technology communities and companies who participate in them, to include, encourage, and recognize people of all races, ethnicities, genders, ages, and abilities. Pulsus s enhances the technology for people from underrepresented groups by actively recruiting diverse speakers for our events, signing up a broad variety of authors for journals and videos, and taking part in ongoing conversations about the value of diversity in the communities we serve.

International conference on parasitology and infectious diseases

SEPTEMBER 21-22, 2017 | SAN ANTONIO, USA

Pulsus *Group takes pride in getting the endorsements of prestigious societies and medical research assosiations world wide.*

Market Analysis

The science deals with parasites and parasitism. Parasite is an organism that lives on host. Throughout history, people have coped with over 100 types of parasites affecting humans. Parasites have not, however, been thoroughly studied until the last few centuries. With his invention of the microscope in the late 1600s, the Dutch scientist Anton von Leeuwenhoek (1632–1723) was perhaps the first person to observe microscopic parasites.

Parasitic diseases are caused by virus; bacteria; fungal; nematodes and protozoans. Some parasitic diseases are caused by plant parasitic not include are ectoparasites like insects, mites, vertebrate, or other pests that affect plant health by consumption of plant tissues.

All most all the universities are carried out a research on parasitology and infectious diseases in USA. The major research areas are including medical parasitology and immunoparasitology which a large group of faculty focused on understanding the immune regulation of host with several parasitic diseases. cell and molecular; biochemical parasitology in which investigators study a range of topics including drug resistance in toxoplasmosis, gene expression in malaria, and the molecular biology and neurobiology of infective nematode larvae, evolutionary biology with projects which focus on the contact trematodes with their snail hosts and the population dynamics of parasites of farmed animals

About City

San Antonio is the seventh most populated city in the us. San Antonio officially called the city of San Antonio. And it is the second most populated city in the Texas with a population of 1,409,019. It was the fastest growing of the top 10 largest city in the us from 2000 to 2010, and the second from 1990 to 2000. The city straddles South Texas and Central Texas and is on the south-western corner of an urban mega region known as the Texas Triangle.

At the time of European encounter, Payaya Indians lived near the San Antonio River Valley in the San Pedro Springs area, calling the vicinity Yanaguana, meaning "refreshing waters". In 1691, a group of Spanish Catholic explorers and missionaries came upon the river and Payaya settlement on June 13, the feast day of St. Anthony of Padua. They named the place and river "San Antonio" in his honour.
