## ABOUT US

Since many years Pulsus has also been very instrumental to provide an invaluable channel for scientists and researchers to exchange ideas and research by creating a forum for discussing the possibilities of future collaborations between universities, institutions, research bodies and organizations from different countries through international conferences and meetings.

Pulsus Group is an internationally renowned medical peer-review publisher and conferences organizer established in the year 1984 publishes and hosts the work of researchers in a manner that exemplifies the highest standards in research integrity.

With a legacy of 39 years of excellence in Medical Publishing we are endorsed by various societies like International Academy of Cardiovascular Sciences, International Society of Addiction Medicine, European Biotechnology Thematic Network Association, World Federation of Paediatrics Intensive and Critical Care Societies, World Association of Medical Sciences, International Society for Ceramics in Medicine, Thalassaemia International Federation and World Association of Integrated Medicine to nurture the research and development for the beneficence of society.

# MARKET ANALYSIS

The global therapeutic market for the parkinsons is projected to reach $112 billion by 2022, with a CAGR of 7.4% from 2021 to 2028. The market has been assessed in North America, Asia Pacific, Europe, Latin America, the Middle East, and Africa. The study provides detailed analyses of R&D initiatives, revenue, services, supply and demand, pricing strategy, consumption, export/import supply, and regional gross margins. As advancements in detecting and treating diseases of the central and peripheral nervous systems occur, the global treatment rate is expected to rise.

Alzheimer's disease, with a market share of over 34% in 2020, is expected to maintain its dominance due to its high prevalence and accessible diagnostic tools like amyloid PET tracers. Government and non-profit institutions offer research opportunities that could drive industry growth, such as the Biomarkers Across Neurodegenerative Diseases (BAND) initiative developed by organizations like the Michael J. Fox Foundation for Parkinson's Research (MJFF) and Alzheimer's Research U.K.

The Parkinson's disease market is projected to grow at a CAGR of 13.2% due to the increasing prevalence and the rise in clinical trials for disease-treating medications. As of 2020, over 930,000 Americans had Parkinson's disease, with approximately 60,000 new diagnoses annually. Innovative research studies are focused on improving the diagnosis of Parkinson's disease.

## TARGET AUDIENCE
