MARKET ANALYSIS

In 2021, the market for medications for Parkinson's disease was estimated to be worth $5.7 billion. By 2031, it is expected to have grown to $10.4 billion, with a CAGR of 6.2% between 2022 and 2031. Parkinson's disease is a neurological condition commonly known as idiopathic Parkinsonism. It is a chronic disorder that affects both the neurological system and the parts of the body that the nervous system regulates. The substantia nigra is a part of the brain where dopamine is made. Parkinson's disease causes the substantia cells in the brain to start dying, which lowers the level of dopamine in the body.

The global Parkinson's disease drugs market also declined in 2020 due to global economic recession led by COVID-19. However, market witness recovery in the year 2021, owing to increase in adoption of Parkinson's disease drugs and rise in R&D pipeline products of Parkinson's disease drugs.

ABOUT VENUE

The Austrian capital is well-known for its illustrious cultural and historical history, which may be experienced at the city's 100 museums or simply by wandering through the streets of the old city centre, which is a part of the UNESCO World Cultural Heritage. One of the world's major centres for music is Vienna.

No other city has produced as many well-known composers, and Vienna's world-famous opera theatre and concert venues preserve music legacy. With two theatres solely dedicated to this genre, contemporary musicals have replaced the outdated operetta.

Vienna is today regarded as a city with a very good standard of living as well as a centre for modern art. In addition to historical attractions, the city provides beautiful instances of cutting-edge architecture, chic retail districts, and more representatives of the Viennese culture in its traditional coffee houses, the Heurigen (wine taverns), hip pubs, sausage sellers, and discos.

Top visiting places:
Schönbrunn Palace Kunsthistorisches Museum | Volksgarten park | Neue Burg building | Salzburg | Innsbruck | Bregenz lakes | Krimml Waterfalls.

Abstract submission opens: March 16, 2023 | **Registration opens:** March 16, 2023
