MARKET ANALYSIS

The Pediatric healthcare market analysis was anticipated to grow with a CAGR of nearly 9.4% during the forecast period. The major factors involved in the growth of the pediatric healthcare market is a rise in the number of deaths due to various diseases and malnutrition every year. For instance, according to estimates published by The United Nations Children's Fund (UNICEF) in October 2019, every year about 6 million deaths occur due to pediatric pneumonia worldwide which demands the earlier diagnosis and efficient treatment fueling the global market. The rise in government support, combined with increased research activities in technological advancements, fuel the pediatric healthcare market.
