ABOUT US

Since many years Pulsus has also been very instrumental to provide an invaluable channel for scientists and researchers to exchange ideas and research by creating a forum for discussing the possibilities of future collaborations between universities, institutions, research bodies and organizations from different countries through international conferences and meetings.

Pulsus Group is an internationally renowned medical peer-review publisher and conferences organizer established in the year 1984 publishes and hosts the work of researchers in a manner that exemplifies the highest standards in research integrity.

With a legacy of 30 years of excellence in Medical Publishing we are endorsed by various societies like International Academy of Cardiovascular Sciences, International Society of Addiction Medicine, European Biotechnology Thematic Network Association, World Federation of Paediatrics Intensive and Critical Care Societies, World Association of Medical Sciences, International Society for Ceramics in Medicine, Thalassaemia International Federation and World Association of Integrated Medicine to nurture the research and development for the beneficence of society.

MARKET ANALYSIS

Medication innovation, development, and distribution all are managed by the pharmaceutical sector. In 2023, the market for pharmaceutical is anticipated to be worth USD 1.57 trillion. From 2023 to 2028, the size of the world pharmaceutical manufacturing market is expected to increase at a compound annual growth rate of 10.34%. This market's growth is expected based on a number of variables, including market drivers, current and predicted trends, current growth patterns, and market challenges.

North America is anticipated to maintain its dominant position in the global pharmaceutical industry, growing its market share from 2017 to 45.2% in 2023. In addition, it is estimated that Europe's market share will decrease from 2017 to 2023 and account for 20.24% of the worldwide pharma industry. With a market share of 24.07% in 2023, the Asia Pacific pharmaceuticals market will continue to maintain its second-place position. In 2023, it is estimated that the pharmaceutical markets in Latin America and the Middle East and Africa (MEA) will retain corresponding market shares of 7.53% and 2.96%.

The pharmaceutical industry in the United States employs over 480000 people and accounts for 0.3% of all employment (OECD 2018b). Although there are many firms within the company, the largest businesses manage a significant amount of the market.

ABOUT VENUE

Paris is the capital and largest city of France. In a northern bend of the Seine in north-central France, the two islands Île Saint-Louis and the larger Île de la Cité make up the oldest part of Paris. The normal oceanic climate of Western Europe is affected by the North Atlantic Current in Paris. All year long, the climate is pleasant and moderately humid. Paris has long been one of Europe's primary centres for commerce, diplomacy, fashion, science, and the arts. Among the most visited sites in downtown Paris are The Louvre, Sainte-Chapelle, and Notre-Dame Cathedral. On the left bank, southwest of the city, lie Les Invalides, home to Napoleon's grave, and the Eiffel Tower. Paris has drawn artists from all over the world for centuries, who flock to the city to train and find inspiration in its extensive collection of creative resources and galleries. As a result, Paris earned the moniker "City of Art." Particularly in sculpture and reliefs, Italian painters had a significant impact on the growth of art in Paris in the 16th and 17th century. During the French Baroque and Classical eras, when painting and sculpture were the glory of the French monarchy, the French royal family hired several Parisian painters to beautify their palaces.
