Important Announcement from the Global Conference on Plastic Surgery and Therapy

Greetings to you attendees,

This week, the number of Covid cases in Zurich has risen dramatically. (Nearly 3000 new cases every day).

The organisation has made a conclusion after evaluating the circumstances and the questions raised by the participants. Just 40 days before its 2021 event in Zurich, the conference announced that it will still take place on October 11, 2021, but in an online-only format to alleviate participant fears of Coronavirus.

Participants who paid for their lodging do not need to be concerned. The funds will be applied to our future event, which will take place next year, in 2022.
