Organic chemistry is the fi eld of science which deals with the study of living things but not as biological study whereas it takes a look at what living things are composed of and how they are structured. It goes a step further to break down living things into atoms and molecules and it focuses mainly on carbon, which is the absolutely necessary to maintain life. Everything in day to day life is composed of hydrocarbons like plastics paints etc. Organic compounds are generally composed of long chains of covalent bonds. The chemistry of the compounds of carbon covers wide fi eld wider than covered by any other element. There is a great demand for organic chemistry in plastics, fuel and pharmaceutical industries. Life is a chemical process, in case of sickeness, medicines are used to make us normal. There are several synthetic and natural drug that chemist has given to medicine. . Several top tier companies are looking forward for novel research in advancement of drug research. More advanced research is essential in drug discovery, production technique, action of drugs, clinical trials of drugs and it is of at most important to understand them all before being recommended to the world market globally

About City and Venue

PULSUS
WWW.PULSUSCONFERENCE.COM

Rome, the Eternal City, is the capital and largest city of Italy and of the Lazio region. It is famous for being the home of the ancient Roman Empire, the Seven Hills, La Dolce Vita (the sweet life), the Vatican City and Three Coins in the Fountain.

Situated on the river Tiber, between the Apennine mountains and the Tyrrhenian Sea, the “Eternal City” was once the administrative centre of the mighty Roman Empire, ruling over a vast territory that stretched all the way from Britain to Mesopotamia.

Architecturally and culturally, Rome has some contrasts - you have areas with pompously huge majestic palaces, avenues and basilicas which are then surrounded by tiny alleyways, little churches and old houses; you may also find yourself walking from a grand palace and tree-lined elegant boulevard, into a small and cramped Medieval-like street.

With so many sights and things to do, Rome can truly be classified a “global city”.
