Market Analysis

The global polymer industry is expected to grow with a CAGR of 3.9% over 2015-2020. The demand for polymer is driven by growth in end use markets, such as packaging, automotive, infrastructure, transport rails, and telecommunication mainly from emerging economies. Polymer is continuously substituting metals, glass, paper, and other traditional. The global Polymer Filler Market size exceeded USD 45 billion in 2015. Increasing demand for high strength and lightweight materials in the automotive and industrial applications is likely to propel the low-density Polymer Filler Market. Polymer fillers due to their improved impact strength are expected to replace costly plastic resins across various industrial products soon. Polymer fillers are likely to gain wider acceptance in various industrial products due to the increasing use of low-cost fillers in countries such as the U.S, India, Germany, Brazil, etc. Stringent guidelines and environmental regulations are expected to influence the global Polymer Filler Market.
