ABOUT VENUE

Paris is the capital and largest city of France. In a northern bend of the Seine in north-central France, the two islands Île Saint-Louis and the larger Île de la Cité make up the oldest part of Paris. The normal oceanic climate of Western Europe is affected by the North Atlantic Current in Paris. All year long, the climate is pleasant and moderately humid. Paris has long been one of Europe's primary centres for commerce, diplomacy, fashion, science, and the arts. Among the most visited sites in downtown Paris are The Louvre, Sainte-Chapelle, and Notre-Dame Cathedral. On the left bank, southwest of the city, lie Les Invalides, home to Napoleon's grave, and the Eiffel Tower. Paris has drawn artists from all over the world for centuries, who flock to the city to train and find inspiration in its extensive collection of creative resources and galleries. As a result, Paris earned the moniker "City of Art." Particularly in sculpture and reliefs, Italian painters had a significant impact on the growth of art in Paris in the 16th and 17th century. During the French Baroque and Classical eras, when painting and sculpture were the glory of the French monarchy, the French royal family hired several Parisian painters to beautify their palaces.
