MARKET ANALYSIS

The rheumatology and musculoskeletal disorder (MSK) market is expected to grow significantly in the coming years. This is due to the rising prevalence of these disorders, aging populations, and increased awareness and diagnosis of these conditions. According to a report by Grand View Research, the global rheumatology therapeutics market size was valued at USD 58.6 billion in 2020 and is expected to grow at a CAGR of 4.6% from 2021 to 2028. Biologic drugs, such as TNF inhibitors and interleukin inhibitors, have become popular for the treatment of rheumatoid arthritis and other autoimmune conditions.
