ABOUT US

Since many years Pulsus has also been very instrumental to provide an invaluable channel for scientists and researchers to exchange ideas and research by creating a forum for discussing the possibilities of future collaborations between universities, institutions, research bodies and organizations from different countries through international conferences and meetings.

Pulsus Group is an internationally renowned medical peer-review publisher and conferences organizer established in the year 1984 publishes and hosts the work of researchers in a manner that exemplifies the highest standards in research integrity.

With a legacy of 30 years of excellence in Medical Publishing we are endorsed by various societies like International Academy of Cardiovascular Sciences, International Society of Addiction Medicine, European Biotechnology Thematic Network Association, World Federation of Paediatrics Intensive and Critical Care Societies, World Association of Medical Sciences, International Society for Ceramics in Medicine, Thalassaemia International Federation and World Association of Integrated Medicine to nurture the research and development for the beneficence of society.

MARKET ANALYSIS

In the upcoming years, there is anticipated to be significant growth in the rheumatology and musculoskeletal disorder (MSK) markets. This can be attributed to the aging population, the rising prevalence of these disorders, and improved diagnosis and awareness of these conditions. The size of the global market for rheumatology therapeutics was estimated by Grand View Research to be USD 58.6 billion in 2020, and it is projected to increase at a compound annual growth rate (CAGR) of 4.6% between 2021 and 2028.

A marketing analysis in the field of rheumatology entails a thorough investigation of the competitive environment, market dynamics, and trends in the rheumatological healthcare sector. Rheumatology is a subspecialty of internal medicine that treats and diagnoses autoimmune diseases and musculoskeletal disorders. Assessing the current prevalence and incidence rates of rheumatic diseases, along with the demographic and geographic distribution of patients, is a necessary first step in conducting a comprehensive marketing analysis. For the purpose of customizing marketing strategies and services, it is essential to understand patient demographics like age, gender, and comorbidities.

WHY TO ATTEND

Medical services meetings are significant on the grounds that it is a chance to bring a ton of medical services experts together to share and talk about a point. This has been a staple in medication and is something we do each day in our expert lives-we talk with one another. Updating of information and abilities. Introducing research papers and getting important knowledge into the examination done by other clinical understudies.

Get valid statements for your resume.

In case you're intending to do a Residency abroad or seek after an MPH/M. Res/Ph.D., at that point it adds to your CV.

The most significant of everything is Awareness. Be mindful of what everything is going on around you and your partners.

ABOUT VENUE

Dubai is the capital of the most populous of the seven emirates in the United Arab Emirates (UAE) and the most populous city itself.

Initially founded as a tiny fishing community in the 19th century, Dubai expanded quickly to become a major regional trading hub in the early 20th century. In the late 20th and early 21st centuries, Dubai concentrated on tourism and luxury. The Burj Khalifa, the world's tallest building at 828 meters (2,717 feet) in height, has the second-most five-star hotels worldwide.

It is a significant hub for international passenger and cargo transportation, located on the Persian Gulf coast in the eastern Arabian Peninsula. The city, which was already a significant mercantile hub, developed more quickly thanks to oil revenue.

Dubai's economy is based on trade, tourism, aviation, real estate, and financial services. It has been a hub for regional and global trade since the early 20th century. In 2018, the emirate's GDP derived from oil production was less than 1%. As of 2021, there are about 3.49 million people living in the city.
